

Sprint 2 Report

Product name: GAR

Date: Nov 10, 2018

Actions to stop doing:

We did not contribute enough time on the project during midterm. People were not prepared for the scrum meeting.

Actions to start doing:

We need to start meeting and working our project on the weekend because we are behind the schedule. (We had tried working together over the last weekend, and we have made some progress on our project.)

Actions to keep doing:

We are going to push ourselves on the project. And we will keep grouping during the weekend whenever we can make grouping happen.

Work completion rate:

The total number of user stories are 6. (2 from Plan 1 left over, 4 from plan 2). We finished both leftover stories from sprint plan 1. (Connect data to frontpage UI & regain password by email). We finished story 1, 2, and 3 from sprint plan 2. And we are researching for a way to conduct story 4 which is to allow user to communicate to each other on the web.

So far, we finished 7 out of 8 user stories from sprint plan 1 and plan 2.

Over all 7 story completed in 25 days. And 1.5 hour per working day per person.

Sprint 2 Burnup Chart
