

Sprint 1 Report

Product name: GAR

Team name: 9ight

date: Oct 17, 2018

Actions to stop doing:

- Login UI

As user, we are now able to login as passenger or driver from the login UI.

- register UI

As user, we need to be able to register as UCSC student.

Actions to start doing:

- Hint for error.

As user, when we can not login or register correctly, we would see the problem from hints.

- Back end on fire base.

Start working on the back end.

Actions to keep doing:

- Verify if email is UCSC email.

As developer, we need the system to check if the email is UCSC email for every register.

Work completion rate:

By far, we have finished the login UI,

Register UI is close to complete. (working on excluding non-UCSC email register)

Back end is on the beginning stage.

About __ percent is done.
