

Sprint 1 Report

Product name: GAR

Team name: 9ight

date: Oct 17, 2018

Actions to stop doing:

We are satisfied with our current process. Three of our team members were transfer from the same college. And all of us took the same course before. 2 of us are roommates. Basically we meet team members everyday, if we have any question, we will discuss and try to solve the problem as soon as we can. If any team member has some technique questions, such as do not know how to write html, css language, there is always an team member can teach him or she.

Actions to start doing:

The team should finish check and write the document (to do list) more frequently. Basically, the team finish the coding part on time, but forgot to finish the document, and reports.

Actions to keep doing:

The communication of the team is very well. The development of the project process works very well, we should keep this pattern.

Work completion rate:

The total number of user stories are 4. We completed the 2 stories. For the third story, we finished half of it. We haven't finish the fourth story yet. The total number of ideal work hours is 10. Until now, because we haven't connect the database to the frontpage, thus, we've only finished the 60% of it.
