Sprint 4 Report

Product name: GAR
Date: Dec 02, 2018

Actions to stop doing:

Stop adding new function to the page which was not on the sprint plan. In another word, we should just focus on what was planned as the highest priority.

Actions to start doing:
We need to start testing all functions along way to the acceptant time.

Actions to keep doing:

We have been doing promising progress during the weekend meeting and coding together. Keep up with the weekend meeting.

Complete:
1. As user, be able to check the history list, so that they could track the ride they did.

2. As user, be able to edit password and email address so that accounts could be more manageable.

3. As driver, be able to receive essential passenger information so that drivers know who they need to pick up.

4. As driver, be able to see detail information from each request so that drivers can know more about who they are.

5. As developer, we need to test and debug our website to increase reliability. Project testing is written in unit test report.

Not complete:
All user stories are completed.

Work completion rate:

All 5 user stories in sprint 4 are finished.
